

Senior Citrix System Consultants for Lean-On's High Performance Cloud Services for CAD Virtualization

Are you ready for the next challenge? Become a True Champion in Modern Cloud IT.

Lean-On have the greatest customers who demand high business value from their cloud supplier. Our promise is the ultimate technology platform and services, which deliver an outstanding user experience and business value, while our team have the greatest project and technologies to work with.

Lean-On is on the move, and we are constantly onboarding new cloud projects, including our new customers' full infrastructure. We never compromise an outstanding user experience, and our enterprise cloud and services empower our customers to achieve their business goals.

We have specialized our offering, today providing the most comprehensive Infrastructure-as-a-Service, Platform-as-a-Service and Desktop-as-a-Service platform including services, and we deliver it all from our datacenter to our customers. Locally and globally.

We use the leading technologies from partners such as Microsoft, Citrix, and Oracle and have an extreme high-end hardware platform, delivering a desktop at unprecedented speed and HPC experience. We have an outstanding cockpit for the management of our customers' infrastructure, and use our knowledge to constantly improve customer value.

We are currently seeking new colleagues in the following areas:

New Business Group:

- Senior DaaS engineer (Desktop-as-a-Service) - a Senior Citrix System Consultant with Citrix Virtual Apps and Desktops and Microsoft RDS experience.

Operations Group:

- Senior Citrix System Consultant for joining our datacenter operation. Required is experience with Microsoft Infrastructure products and Citrix.

As a part of the team we expect you to be a self-driven team player and proactive by nature.

We are now moving into the next growth phase. Together as a team we are building an awesome workplace, all of it combined with an attractive compensation package matching your new position.

We would like to hear from you if you are missing a great challenge and would like to be at the forefront, making your mark on a high-performance cloud platform for the future, in a company with a great DNA and culture.

If you have any questions for the positions, please contact IT operations manager Jan Sejer Sørensen on tel. +45 2210 6555.

Please forward your application to job@lean-on.com. Applications are reviewed on an ongoing basis. We look forward to hearing from you!
