

## **CASE - KIBO SIKRING A/S: MECHANICAL AND ELECTRONIC SECURITY SOLUTIONS AND SYSTEMS**

### **ABOUT KIBO SIKRING A/S**

*Kibo Sikring is your total supplier and 360-degree security partner in mechanical and electronic security solutions and systems. As the largest security supplier in Denmark they design, install and service small and large solutions in mechanical security and electronic monitoring. With 135 employees spread across four locations in Denmark, KIBO Sikring is dedicated to creating a safe framework for the lives and values of companies, municipalities and government institutions – all with very different risk profiles.*

### **WHY LEAN-ON**

*“The choice of Lean-On as a cloud partner was based on their in-depth professional expertise in high-performance VDI, and the professional ability to meet our current situation and requirements. Their ability in establishing a solution that secures our innovative interests of the business and keeps our IT security and operational stability intact, has only proven to be beyond expectations so far.*”

*Lean-On has the level of skills and professional expertise to boost Virtual Desktop Infrastructure to the benefit of our business, which is difficult to match elsewhere in the market. Furthermore they do so with a high awareness and business perception that testifies to a deep understanding of how IT creates value for our organization.”*

Morten Olesen, CFO and Owner  
– Kibo Sikring A/S

## About Lean-On A/S

Lean-On A/S is one of Europe's leading Cloud Solutions Providers of high-performance VDI and Cloud computing. We provide the market's best performing VDI services and customer experience, seamlessly integrated into a high-performance platform, including an ecosystem built for engineers and companies with high-demanding users and global needs. Lean-On enables your users to utilize the full potential of their industrial applications, to meet changed demands, and to empower digital drivers under the Fourth Industrial Revolution.

We are domain experts within centralized IT operations, virtual computing, and HPC services, who are eager to work on some of the most challenging problems within high-performance VDI and HPC, and have a market-leading customer reference base to prove it.

Lean-On has globally leading know-how in technologies from Apache Cloudstack, Citrix, Intel, AMD, Microsoft, Supermicro, Nvidia, Ivanti, as well as suppliers of ZFS storage (Oracle, OmniOS and Nexenta), supplemented with in-house developed products.
