

# Senior **Citrix Hypervisor** Expert for Lean-On's High-Performance Desktop-as-a-Service Cloud

---

Lean-On has exciting opportunities for people passionate in cutting edge Desktop-as-a-Service technologies.

Are you ready for the next challenge?

Become a true champion as a Senior Citrix Hypervisor Expert supporting our unique Desktop-as-a-Service cloud fabric.

For our customers the best is not enough. They demand outstanding value and productivity gains for their users. Hence, we never compromise an outstanding user experience, and our enterprise DaaS advanced services empower our customers to achieve their business goals. We are on the move, constantly onboarding new cloud projects. As such, new technologies with astonishing results have led us to serve thousands of DaaS users globally from our data centers in Denmark and North America.

We use the leading technologies from partners such as Microsoft, Citrix, and Nvidia and have an advanced high-end hardware platform, providing a range of services and a virtual desktop with an unprecedented user experience. Our focus is to support resource-intensive CAD and other engineering users worldwide.

The future belongs to Desktop-as-a-Service technologies, and we have specialized in providing the most comprehensive Infrastructure-as-a Service, Platform-as-a-Service and Desktop-as-a-Service platform on the market today. Locally and globally.

## We are Currently Seeking a Senior Citrix Hypervisor Expert

The Citrix Hypervisor is not a mainstream hypervisor, like other more common hypervisors on the market. Therefore, we know you are not that easy to find. However, if your knowledge is deep on the Citrix Hypervisor, we have an outstanding position open!

As our new Senior Citrix Hypervisor Expert, you will be working in a dedicated team with an always expanding toolset in order to optimize the GPU server universe that we operate. Speed, agility and security are some of the key components.

### Your Comfort Zone

You need to be in a great a comfort zone in relation to the Citrix Hypervisor:

- Deep knowledge and 5+ years' experience as a System Administrator or Engineer on the Citrix Hypervisor. Version 8.x and beyond.
- Optimizing and maintaining settings for Citrix Virtual App and Desktops.
- Knowledge on Citrix Virtual App and Desktops
- Understanding
  - Integration to Microsoft server infrastructure technologies,
  - MS infrastructure operations experience.
- General knowledge on infrastructure hardware such as
  - Servers – The GPU handling, CPU settings,
  - Routers, switches and firewalls is useful but not required.
- Infrastructure design, deployment and upgrade.
- 2<sup>nd</sup>/3<sup>rd</sup> level troubleshooting and analytical problem investigation.
- Documentation of existing and new infrastructure and solutions.
- Backup and recovery operations, systems security and auditing.
- System Transition & Transformation, and automation of those.

As a part of the team, we expect you to be a self-driven team player and proactive by nature.

As we are now moving into the next growth phase, we of course offer an attractive compensation package matching the new position.

We would like to hear from you if you are missing a great challenge, and would like to be at the forefront, making your mark in a company with a great DNA and culture.

Please forward your application to [job@lean-on.com](mailto:job@lean-on.com). Applications are reviewed on an ongoing basis. We look forward to hearing from you!
